SPRING/SUMMER 2018

WORLD CENTRIC

We envision a thriving world where everyone's basic needs are met with a beneficial impact on the environment.

The Importance of Compostables

More than 20 million tons of plastic are placed in U.S. landfills each year. Products made from plants, not petroleum, conserve oil resources and support cleaner production methods while protecting the health of our planet and diverting waste from the landfill.

We are one of the few companies in the U.S. to sell only plant-based, certified compostable products while striving to be a model of sustainability and generosity. Since 2009, we have given at least 25% of our pre-tax net profits annually to grassroots social and environmental organizations as well as offered discounts to schools and non-profits. We have also offset all of our carbon emissions from raw material to delivery. In 2010 we became a Certified B Corporation, and in 2013 converted our legal structure to a California Benefit Corporation, demonstrating our continued commitment to make a positive impact on society and the environment.

Our Promise

Our products are designed for performance, strength and aesthetic. Our claims are third party verified and we regularly audit outsourced factories under Fair Labor Organization guidelines to ensure fair wages and working conditions.

Partners

We're passionate about collaborating with businesses and organizations to pioneer innovative approaches to environmental challenges. By partnering with our customers, we hope to inspire others to shift their behavior around consumption and waste.

25% OF PROFITS DONATED

ZERO CARBON

100% COMPOSTABLE

WE EXIST FOR GOOD

Our Giving

World Centric donates at least 25% of profits in cash and products to social and environmental organizations worldwide. We also offset all of our carbon by giving to grassroots organizations that work directly with people and communities that manage forests.

Social and Environmental Responsibility

25% OF PROFITS DONATED

Giving

Each year we donate at least 25% of our profits to support projects around the world that promote social and economic development, environmental education, and waste reduction.

100% ZERO CARBON

Carbon Offsets

We partner with environmental and social organizations whose programs not only offset our carbon emissions but also create regenerative ecosystems.

100% COMPOSTABLE

100% Compostable Products

All of our products are 100% compostable in a commercial composting facility and are made from materials that follow the cycle of life on Earth: beginning and ending as nutrient-rich soil.

WE EXIST FOR GOOD

B Corp Certified

As a part of the B Corp community we harness the power of business to solve social and economic problems.

IMPACT ACCELERATOR

Impact Accelerator

We offer zero-interest long-term loans or donations to nonprofits and social enterprises aligned with our mission and values.

ZERO WASTE

Zero Waste

We strive to be a zero-waste office by reducing our consumption and diverting waste to compost and recycling.

FEATURED IMPACT STORY

Spark MicroGrants

"If we want to fix the way aid is working we have to build a bottom up approach."

- Sasha Fisher

Founded in 2010 by entrepreneur Sasha Fisher, Spark MicroGrants takes a unique approach to stimulating community development in poverty stricken areas across Rwanda, Uganda, Burundi, the Democratic Republic of the Congo, and Ghana.

Their six-point process sparks communities into becoming their own change agents by facilitating the planning and development of their own goals.

In 2016, World Centric provided micro-grants of over \$39,000 to help design, implement and manage social impact projects in five poor, rural communities.

These projects ranged from starting a bean seed business to creating a savings and loan to increase communal income, build personal savings, and help mitigate

Community members work together to develop goals for their project using the Spark MicroGrants method.

tensions between households in the region. No interest or repayment of funds was required.

According to the Spark website, "of the village projects backed by Spark, 94 percent are sustaining, 77 percent have launched secondary projects independently and 90 percent have continued to host regular community meetings where they discuss important topics."

PLANT FIBER PLATES, BOWLS, CUPS AND TAKE OUT CONTAINERS

Hundreds of fibrous plants can be turned into alternatives to tree-based paper products. In the past these plants were treated like agricultural waste after grain or juice was extracted from crops. At World Centric we see them as a valuable resource that can be made into products like plates, take out containers, bowls and other useful items.

PAPER CUPS, SLEEVES, BOWLS, LIDS, NAPKINS AND TOWELS

Our hot cups and bowls are made from FSC paper with a plant-based lining, instead of the usual petroleum based lining, which makes them compostable in 2-4 months in a commercial composting facility.

Hot Cups
Assorted Sizes

PLA Lid- 10- 20 oz
CUL-CS-12

Hot Cup Sleeve
SL-PA-LG

- White/kraft cups made from FSC® paper (FSC-C028481) with NatureWorks Ingeo™ PLA lining
- Double wall, white cups made from SFI® certified paper with NatureWorks Ingeo™ PLA lining
- Suitable for liquids up to 220°F
- Freezer safe
- Lids and cups are not microwavable
- Heat-resistant lids (180° F) and clear lids (120°F) made from NatureWorks Ingeo™ PLA compostable plastic, derived from corn grown in the USA
- Compost in 2-4 months in a commercial composting facility

World Centric products are USDA Certified Biobased Products, made from renewable agricultural ingredients

The USDA BioPreferred label designates biobased products that are composed wholly or significantly of agricultural ingredients—renewable plant, animal, marine or forestry materials.

All products with this label have been independently certified to meet USDA BioPreferred program standards for biobased content. Biobased products help add value to commodities, create jobs in rural communities, increase U.S. energy independence by reducing the use of petroleum in manufactured products, and may also reduce the introduction of fossil carbon into the atmosphere, thus mitigating potential climate change impacts.

SCS Global Services does hereby certify that an independent audit has been completed and conformity to the applicable standard(s) has been confirmed for:

World Centric

101 H Street, Suite M, Petaluma, CA 94952-5152, United States

This certificate covers the trade of paper products using the transfer system.

The facility(s) are hereby Chain of Custody certified to sell products as:

FSC Mix

The assessment has been conducted by Scientific Certification Systems (SCS) in accordance with the rules of the Forest Stewardship Council® A.C. (FSC).

FSC Standard: FSC-STD-40-004 V2-1

Certificate Code: SCS-COC-002849 Trademark License Code: FSC-C028481

Valid from 12 November 2014 to 11 November 2019

This certificate itself does not constitute evidence that a particular product supplied by the certificate holder is FSC-certified (or FSC Controlled Wood). Products offered, shipped or sold by the certificate holder can only be considered covered by the scope of this certificate when the required FSC claims are clearly stated on sales and delivery documents, and the validity of the certificate has been verified on <http://info.fsc.org>. A list of products that are included in the scope of this certificate may be found at <http://info.fsc.org> or will be provided by SCS on request. The certificate shall remain the property of SCS, and this certificate and all copies or reproductions of this certificate shall be returned to SCS immediately upon request.

INGEO™ PORTION CUPS, COLD CUPS, BOWLS AND DELI CONTAINERS

Compostable plastics are a new generation of plastics derived from renewable plant-based materials like starch, cellulose, and soy protein. Our products are made from Ingeo™ (technically known as polylactic acid or PLA) and have a heat resistance of 110°F. This heat resistance makes Ingeo well suited for clear cups, deli containers, straws, etc.

Lid PLA, Domed
CPL-CS-12D

Cold Cups

PLA CUTLERY, ZEROWARE™ AND WASTE BAGS

World Centric compostable cutlery and ZeroWare™ are designed to reduce waste and provide a safe, non-toxic alternative to plastic. Great for camping, kids parties, or picnics, our ZeroWare compostable plates and bowl can be reused at least 100 times, at which point they can be composted in a commercial composting facility.

6" Wrapped Cutlery Set

Our Third Party Verifications

World Centric Products are BPI Certified

The following PRODUCTS have been found to comply with the specifications established in the American Society for Testing and Materials standard ASTM D6400 and/or D6868 in accordance with the terms and conditions of the "Biodegradable Products Institute - Certification Program for Products Made of Compostable Plastics - Program Rules":

| Product | Certificate # |
|--|---------------|
| Natural colored molded pulp fiber products made from sugar cane bagasse and wheat straw, with a maximum thickness of 0.54mm | #1918104-4 |
| White cutlery, bowls & plates with a max. thickness of 2.68 mm made from a BPI approved resin | #1918104-3 |
| Clamshells, deli containers, trays, soufflé cups, straws, and cold cups and cold cup lids made from a BPI-certified resin with a maximum thickness of 0.35mm | #1918104-1 |
| Paper cups coated with NatureWorks Ingeo PLA | #1918104-9 |
| Compostable bags with green printing, with a max. thickness of 1.0 mil, made from BPI approved resins | #1918104-9 |
| White-colored hot drink lids with a maximum thickness of 0.37mm, made from BPI-approved resin | #1918104-12 |
| Food Service Items made from Miscanthus fiber (maximum thickness of 0.75mm) | #1918104-13 |

Certifications awarded by the Biodegradable Products Institute can be found on the World Centric website (www.WorldCentric.org) and permit the use of the Certification Program Logo depicted below subject to all conditions and terms of the Program Rules and the License Agreement between the Biodegradable Products Institute and the Licensee, World Centric.

COMPOSTABLE
IN INDUSTRIAL FACILITIES

Check locally, as these do not exist in many communities. **Not suitable for backyard composting.** CERT # 1918104

ELISA Technologies, Inc.

REPORT 1006085

REPORT DATE: June 22, 2010

REPORT TO: Aseem Das
World Centric
2121 Staunton Ct
Palo Alto, CA 94306
Tel: (650) 283-3797
Fax: (866) 850-9732

SUBJECT: Sample for Gluten Analysis

RECEIVED: June 21, 2010 UPS 2nd Day Air TRK# 1Z 3V8 2E1 02 4165 2530

ANALYTICAL RESULTS:

| CONTROL # | SAMPLE DESCRIPTION | ANALYSIS IDENTIFICATION | Gluten* |
|-----------|--------------------|----------------------------------|---------|
| 1006085-1 | Wheat Straw Plates | 500821 Quantitative Gluten ELISA | < 5 ppm |

RESULTS APPLY ONLY TO THE SAMPLES TESTED

***NOTES:**

The assay utilizes ELISA techniques and is designed for the measurement of cereal gluten at low levels, nominally within a range of 5-80 PPM, in raw materials and finished food products; it detects both the gliadin and glutenin fractions of gluten.

These samples were tested using a "high sensitivity" modification of the gluten assay procedure, which enables a detection limit of 5 ppm gluten in most sample matrices. The quantitation limit for your sample(s) was 5 ppm.

Respectfully Submitted for **ELISA Technologies, Inc.**

We are a Certified B Corp

We became a B Corp in 2010 to be part of the collective voice of companies that are about integrity, responsibility, sustainability and doing good in the world.

Certified

Corporation™

bcorporation.net

Declaration of Interdependence

*We envision a new sector of the economy
which harnesses the power of private enterprise to create public benefit.
This sector is comprised of a new type of corporation — the B Corporation
which is purpose-driven, and creates benefit for all stakeholders, not just shareholders.*

As members of this emerging sector and, as entrepreneurs and investors in B Corporations,

*We hold these truths to be self-evident:
That we must be the change we seek in the world;*

That all business ought to be conducted as if people and place mattered;

*That, through their products, practices, and profits, businesses should aspire to
do no harm and benefit all.*

*To do so, requires that we act with the understanding that we are each dependent
upon another and thus responsible for each other and future generations.*

the change we seek™

Why Use Our Products?

Sustainable Materials

Made from annually renewable plants like wheat, sugarcane, silver grass and corn instead of non-renewable petroleum (plastics and Styrofoam). Sugarcane fiber and wheat straw products are the most sustainable as they are made from discarded agricultural by-products.

Reduce Waste

Plastic and Styrofoam are derived from petroleum and create pollution and toxicity during production, use and disposal. Compostables come from plants. They are non-toxic, non-polluting, and reduce waste going into landfills. They biodegrade in a commercial composting system and produce nutrient-rich soil in 3-4 months, while plastics and Styrofoam persist for hundreds of years in the environment.

Use Less Energy

Our products require less energy to produce than petroleum-based products and reduce greenhouse emissions, lessening the impact of global warming.

Our Eco-Profile Analysis

This eco-profile analysis measures the energy and other inputs required to make a product, from the extraction or harvesting of raw materials to the finished product at the factory gate.

OUR PRODUCTS ARE RESPONSIBLE FROM START TO FINISH

Conform to ASTM D-6400 Standard and BPI Certified; Compost in 2-5 months in a Commercial Composting System.

Fiber Plates, Bowls, Trays and Clamshells

- Made from plants, such as wheat straw, sugarcane, silver grass, or bamboo
- No wax or plastic lining
- Freezer safe
- Gluten free
- Oven safe up to 450°F for 45 minutes (lids are not microwave or oven safe)
- Conform to FDA guidelines for food use

TPLA (70% PLA and 30% Talc) Utensils

- Made from non-GMO cornstarch and talc
- Conform to FDA guidelines for food use

Paper Hot Cups & Bowls with Ingeo™ Lining

- Made from Forest Stewardship Council® paper
- Ingeo™ lining made from corn
- Conform to FDA guidelines for food use
- Not microwavable

Cold Cups, Deli Containers, Straws, Lids

- Made from Ingeo™ compostable plastic, derived from corn grown in the USA
- Conform to FDA guidelines for food use

Trash, Produce and Yard Waste Bags

- Made from a mixture of synthetic and starch-based plastics
- Certified by TÜV AUSTRIA OK Compost Home.
- Strong and durable
